

BEKINA[®]

BOOTS

Built to last

NEOTANE[®]

At Bekina Boots we develop and make professional work boots. We have been doing this since 1962 in Kluisbergen, in the heart of the Flemish Ardennes. For three generations now, we have been giving it our all every day in making safety boots with passion and craftsmanship.

After almost 60 years, our company has acquired an international status with super-comfortable safety boots that find their way in more than 50 countries worldwide: from New Zealand to Canada and from Chile to Russia.

Our boots are made from Neotane®, a high quality

polyurethane. As a result our boots are light and strong, have a high thermal insulation value and last a long time.

Today, millions of professionals around the world wear Bekina Boots in a wide range of sectors: agriculture, fisheries, construction and the food industry. Bekina Boots are worn under extreme working conditions all day long. Every day our boots guarantee the safety and comfort professionals deserve!

In addition, we conduct our business in a socially and environmentally responsible manner.

the power of

Bekina Boots

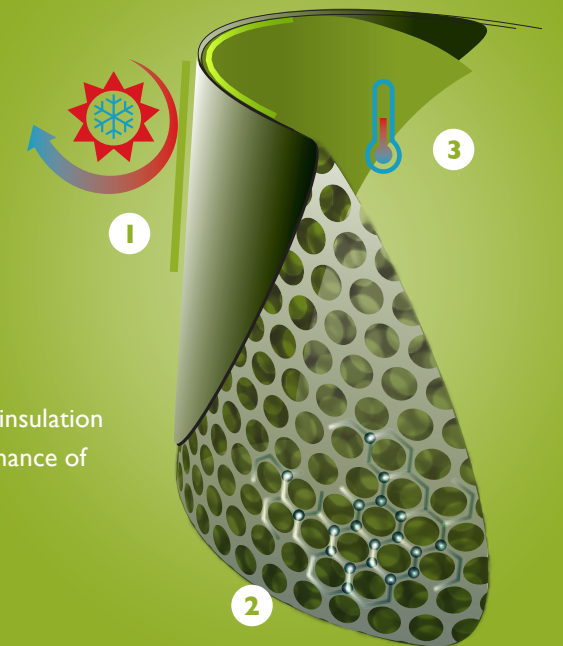

NEOTANE®

THE ADVANCED FORMULATION OF POLYURETHANE

Bekina Boots made using **NEOTANE®** material have extraordinary features. They are light, insulating, comfortable and strong. They provide excellent protection against dirt and have an optimal chemical resistance. Today, we have a full range of **NEOTANE®** products. Depending on the sector you operate in, our R&D specialists developed the custom **NEOTANE®** recipe with the needs and requirements of your industry in mind, thus meeting the needs of its users.

Bekina Boots are 40% lighter than rubber or PVC boots, have a high insulation value and last three times longer. This is due to the excellent performance of our high-quality polyurethane material: **NEOTANE®**.

- ❶ Sealed skin: strong and impermeable on the outside
- ❷ Tiny air bubble structure: light and insulating
- ❸ Self-regulating thermal process on the inside

BEKINA BOOTS REBRANDING!

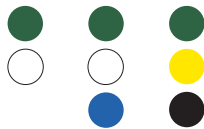

A powerful brand is key to success. To make our product range easier to understand, we gave the naming of our boots a facelift! By simplifying the naming process, a boot now belongs to a particular family of boots, based on the combination of the name of the shaft with the name of the sole.

Name of the shaft — **steplite**⁰⁴ — Safety level

EASYGRIP — Name of the outsole

METAL-FREE

COMFORT AND SAFETY AT SEA

Working in professional fishing means working long hours on a boat. Fortunately, StepliteX StormGrip now keeps the crew safe, warm and dry!

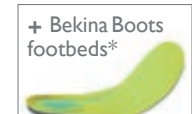

StepliteX StormGrip offers superior grip on any surface in extreme conditions. Equipped with this boot, a fisherman always finds himself on solid ground, even on wet and slippery decks.

S4 XAT3P/1053G

FEATURES

- lightweight, wide fitting
- safety: steel toe cap (S4)
- easy to clean and to disinfect
- resistant to fats, oils, blood and a variety of chemicals

RUBBER TIGERGRIP OUTSOLE

- extremely high anti-slip properties
- extra wear resistance
- soft cushioning
- unique shape and geometry of the cleats
- built-in canals which regulate the flow of water
- self cleaning sole profile

AVOID WORK-RELATED ACCIDENTS AND SAVE MONEY

15% of accidents at work in the food industry are caused by slipping, tripping and falling. StepliteX TigerGrip anti-slip boots are equipped with a rubber TigerGrip sole with a unique sole profile. The unique composition of the rubber compound, combined with the shape and geometry of the treads, ensures extremely high anti-slip properties. Together with the built-in canals which regulate the flow of water in the sole, this ensures a very good grip of the TigerGrip sole on slippery surfaces.
